Dear Colleagues:

Over the last few years there has been some discussion and suggestions made by various members to change the format of our annual Peter Neurath Young Investigator's Symposium. The Executive Committee will be considering changes for the next symposium.

In order to help us with the possible changes, I am requesting that all former young investigators write me indicating both their positive and negative experiences with the symposium. In particular, was the competitive aspect of the program a negative experience?

All previous members who have acted as reviewers are also invited to indicate possible changes that would improve their role in the symposium.

Sincerely,

Karen P. Doppke

KPD/bg
